These findings have important implications for the management of young people with mental health problems. The findings suggest that young people with mental health problems are at a higher risk of being involved in the criminal justice system than their peers. This is particularly true for young people with a history of mental health problems. The findings also suggest that young people with mental health problems are at a higher risk of being involved in the criminal justice system than their peers. This is particularly true for young people with a history of mental health problems. The findings also suggest that young people with mental health problems are at a higher risk of being involved in the criminal justice system than their peers. This is particularly true for young people with a history of mental health problems.
